Task Assignment and Role

Prepared by: Rank-s

The project team has five members who will work together during every stage of the project.
We will handle requirements analysis, planning, development, software testing, documentation, and the final presentation.
Each member will have a duty to keep the project team coordinated.
All major project activities will be shared by the project team.

The Member	ROLE	Main Responsibilities
Mahmoud Muhammad Abdelhafez	Team Leader & Project Coordinator	Organize tasks, check on progress, manage the project schedule, set up team meetings, and track tasks and problems in Jira. |
Kariman Ahmed Hamza	Software Tester. Automation & Test Reporting	Write unit and integration tests using JUnit run Selenium UI tests and Postman API tests if the chosen architecture allows, run regression tests and create test reports.

Mina Boles Alfy	| Java Developer. Transactions & Data Storage	Add deposit, withdrawal and money transfer functions track transaction history check user input and save data properly with the team.
Mariam Yasser Mohamed	Software Tester. Manual & Static Testing	Look at requirements and code make test plans and cases do manual and negative testing report bugs and check if fixes work.
